CloudScale365 Hosted Exchange

Offer Your Customers a Reliable and Secure Email Solution

For many companies email has become one of the most important modes of communication but maintaining a reliable and secure email system can be costly and IT intensive. Hosted Exchange from CloudScale365 gives your customers high-end communication tools while minimizing their costs and freeing up valuable IT resources. CloudScale365's Hosted Exchange product enables organizations of all sizes to utilize the enterprise-class messaging, collaboration and group scheduling features offered by Microsoft Exchange at an affordable cost.

Features of CloudScale365 Hosted Exchange Include:

Industry-Leading Uptime

CloudScale365 manages one of the most robust and optimized Hosted Exchange infrastructures in the world with better than 99.999% uptime. We ensure that your customer's email is working so they can maximize their productivity.

Performance-Optimized Servers and Network

CloudScale365 manages your customer's email on premium quality hardware resulting in better performance and fewer failures. Unlike other large providers we under-load our servers so our customers are not competing for server resources and bandwidth resulting in faster mail, mailbox and mobile phone performance.

Redundancy

CloudScale365's entire system is a fully redundant cluster of Exchange servers preventing any single problem from stopping your customer's email or corrupting your data. We also offer 14 day recovery of deleted items.

Symantec

Premium Anti-Spam / Anti-Virus functionality from Symantec protects your customer's valuable email assets, increases employee productivity and safeguards business integrity. Included with all CloudScale365 Hosted Exchange accounts, Symantec products combat evolving email-born threats while enabling administrators to create and enforce usage guidelines.

EXCHANGEMYMAIL

HOSTED EXCHANGE

Distribution Lists
CloudScale365 Hosted Exchange allows your customers to build email groups with both company and outside email addresses to quickly send broadcast emails to reach many people at once.

Active Directory Sync
Allow your customers to sync their active directory with CloudScale365 and provide the simplicity of a single username and password to access email as well as local software and IT. This feature allows companies to keep their corporate data secure with a centrally-managed identity system that is controlled internally.

Powerful Web Based Control Panel
CloudScale365's control panel is powerful without being complex and offers your customers total control of their email, just as if the Exchange servers were in their offices. Companies access the control panel on the web from anywhere to make any additions or changes to their own users or settings.

Automated Migration Tools
CloudScale365's Hosted Exchange service includes automated tools so customers can quickly set up their users and migrate their existing emails to the CloudScale365 system. We help ensure that our customers are up and running quickly without any problems. We migrate large infrastructures over weekends and holidays to ensure business uptime and testing is completed before employees come to work.

24 x 7 Customer Support From US-Based Staff
We're here to ensure the success of our customers. Many providers make it difficult to contact them, we make it easy. Just call us anytime. We do our best to make sure our customers are completely satisfied at all times. Our entire support team is made up of US-based CloudScale365 employees. We don't outsource support to 3rd parties or overseas offices.

Certified Expertise
CloudScale365 is a highly trained professional team of support staff and systems engineers. Our team goes through rigorous training and certification before they work with customers and our infrastructure. CloudScale365 is a Microsoft Gold Certified Partner and a RIM alliance member.

Dedicated On-Boarding Specialist
CloudScale365 is a full-service Infrastructure as a Service (IaaS) company. While other providers require customers to self-serve their setup and migration, we provide hands-on help to make getting started with CloudScale365 fast and simple. Once a customer enrolls with CloudScale365, a dedicated on-boarding consultant is assigned. Then a CloudScale365 professional works one-on-one with each customer to ensure a smooth enterprise-wide transition, and that the email system is setup to the customer's specifications.

Data Center
The CloudScale365 Data Center is SAS 70 certified and built to tier 4 specifications. It has Distributive Redundant Power with 4 separate sources of internet inputs.
