DATTO BACKUPIFY FOR OFFICE 365

The leading cloud-to-cloud
total data protection platform

About Datto's Backupify Solution:

Datto Backupify is the leader in cloud-to-cloud backup, offering an all-in-one backup, search, restore and export solution for Salesforce, Office 365, Google Apps and more. Backupify ensures companies can access and control the data they entrust to these systems and prevents data loss from external threats, user errors, and service failures.

The Common Causes of SaaS Data Loss

As companies increasingly move data into cloud-based applications, many think traditional IT best practices are outdated. After all, a SaaS application is always available, accessible from anywhere and highly redundant. Why is a backup necessary?

The truth is even data in cloud-based applications is vulnerable to:

- Virus or ransomware damage
- End-user deletion
- Operational errors such as accidental data overwrite
- Lost data due to a cancelled account subscription
- Misbehaving application workflows

How vulnerable is cloud-based application data? An astonishing 1 in 3 companies report losing data stored in cloud-based applications. Gone. Lost. Forever.

Clearly, best practices like data backup are just as important in the cloud as in traditional on premise IT systems.

Keep Data Secure with Enterprise-Grade Protection and Control

Backupify is the leader in reliable, secure cloud-to-cloud data protection and recovery. We're the first and only cloud-to-cloud backup provider to achieve SOC 2 Type II compliance, which provides rigorous standards for data security. All data in transit and at rest is encrypted, and we follow cloud security best practices for our internal controls and customer notifications. We continuously monitor and review data controls, as well as do annual penetration testing. With Backupify, you get total data protection.

BACK UP, SEARCH FOR, AND RECOVER DATA EASILY WITH DATTO

Automatically Back Up Data

Rest easy with Datto Backupify's automatic 3x/day backup for Office 365's Exchange, OneDrive, and SharePoint. Perform additional backups as needed at any time. Get notifications at a glance, right on the dashboard, about all backup information.

Quick Search Capabilities

Easily find data with advanced search options, and restore individual items or entire folders.

Easily Restore and Export

Save business downtime with a non-destructive restore process. Retrieve data with one click in the original format – the file and label structure is maintained in the back up. Recover individual items or entire sites without overwriting existing information.

Security and Compliance

Protect business data with powerful security controls, including compliance with SOC 2 Type II reporting standards, as well as HIPAA compliance. All data is encrypted end-to end in transit and at rest in our Datto Cloud with a customer held unique AES 256-bit encryption key.

Completely User-Lifecycle Management

Manage active users, deleted users and new users from a functional dashboard with ease. Maintain a constant, detailed record of all administrator and user actions.

User Data Retention

Save money and effort by automatically holding inactive users' data with Backupify forever.
